

MARS

Day 1	
Morning: Arrival at Mars Spaceport	Tourists would disembark from their spacecraft and receive a welcome briefing.
Afternoon: Settling into Mars Habitat	Tourists would check into their Mars habitat, where they'd have a chance to relax, refresh, and get acclimated to the Martian environment.
Day 2	
Morning: Martian Landscape Tour	Tourists would embark on a guided rover tour to explore the Martian surface, visiting intriguing geological formations and taking in breathtaking Martian vistas.
Afternoon: Red Planet Science	Visit a Mars research facility where scientists share their knowledge about the planet's geology, climate, and potential for colonization.
Day 3	
Morning: Martian History Museum	Learn about the history of space exploration, including the Mars missions that paved the way for tourism.
Afternoon: Martian Cuisine	Taste Mars-inspired cuisine, created using local ingredients or specially transported Earth delicacies.
Day 4	
Morning: Spacewalk Experience	Under controlled conditions, tourists could simulate a spacewalk, experiencing what it's like to float in Martian gravity.
Afternoon: Visit to a Martian Base	Explore an operational Martian base and interact with scientists and engineers working on the planet.
Day 5	
Morning: Martian Sports	Participate in Martian sports and activities like lowgravity hiking, Martian football, or even traditional Earth sports adapted for Mars.
Afternoon: Relaxation and Souvenirs	Enjoy some downtime, shop for Martian souvenirs, and capture last memories of your Mars trip.
Day 6	
Morning: Mars Rover Driving	Tourists can have the opportunity to drive a Mars rover under the supervision of experts, navigating the rugged Martian terrain.
Afternoon: Martian Extreme Sports	Try Martian extreme sports like
Day 7	
Morning: Martian Sustainability Initiatives	Learn about the efforts being made to establish sustainable practices on Mars, including recycling, water conservation, and renewable energy sources.
Afternoon: Participate in a Mars Sustainability Workshop	Get hands-on experience with Martian sustainability efforts, such as planting Martian crops or testing new technologies for survival on the planet.

SATURN

Day 1	
Morning: Arrival at Saturn Space Station	Tourists would disembark from their spacecraft at a space station orbiting Saturn and receive a welcome briefing on safety, environmental challenges, and the unique features of the Saturnian system.
Day 2	
Morning: Ring Exploration	Tourists would embark on a spacecraft tour through Saturn's stunning ring system, with opportunities for close-up observation.
Afternoon: Moon Landing	Visit one of Saturn's captivating moons, such as Titan or Enceladus, to explore their diverse landscapes and potential for scientific study.
Day 3	
Morning: Atmospheric Probe Descent	Descend into Saturn's upper atmosphere using specially designed atmospheric probes with observation decks to study the planet's gaseous envelope.
Day 4	
Morning: Geology Field Trip	Visit sites on Saturn's moons or ring particles to study their geological formations, volcanoes, and potential for future exploration.
Day 5	
Morning: Tour of Saturn's Moons and Shepherd Moons	Explore Saturn's unique moon system, including its inner "shepherd moons" that help shape the rings.
Day 6	
Morning: Auroral Observatory	Witness Saturn's mesmerizing auroras up close and learn about the planet's magnetic field.
Day 7	
Morning: Saturnian Photography Workshop	Learn the art of capturing breathtaking images of Saturn's rings, moons, and atmospheric features.

Jupiter

Day 1	
Morning: Arrival at Jupiter Space Station	Tourists would disembark from their spacecraft at a space station orbiting Jupiter and receive a welcome briefing on safety and the unique challenges of visiting a gas giant.
Day 2	
Atmospheric Probe Experience	Tourists could descend into the upper atmosphere of Jupiter using specially designed atmospheric probes equipped with observation decks and sensors to study the planet's immense storms.
Day 3	
Magnetic Field Observation	Visit a research station studying Jupiter's powerful magnetic field and its effects on the surrounding environment.
Day 4	
Visit to the Great Red Spot	Tourists could experience close encounters with the Great Red Spot, a massive storm on Jupiter, by remotely piloting specially designed observation vehicles.
Day 5	
Visit to Jupiter's Galilean Moons	Take a spacecraft tour to one of Jupiter's fascinating moons, like Europa, Io, Ganymede, or Callisto, to explore their unique geology and features.
Day 6	
Gravity-Assisted Adventures	Experience the unique challenges and thrills of low-gravity activities within Jupiter's orbit.
Day 7	
Visit to Jupiter's Ring	Witness the rare and beautiful ring system of Jupiter up close, with guided tours through the rings.
